

#### **Quarterly Labour Force Survey (QLFS) Q1:2022**

**Risenga Maluleke** Statistician-General

# COVID-19 Impact and way forward on Data Collection

- \* Restrictions necessary to combat COVID-19 created an obstacle to normal data collection approaches and operations, exactly when there was a massive increase in the demand for information.
- ❖ Stats SA changed the mode of collection for QLFS data to Computer Assisted Telephone Interviewing (CATI) from Q2:2020 to Q4:2021. The mode of data collection using CATI saw the response rate of the survey decline over time to level of concern to the organization reaching 44,6% in the 4<sup>th</sup> quarter of 2021. With the easing of the lock- down levels restriction the organization took a decision to revert to face-to-face data collection using the Computer Assisted Personal Interviewing (CAPI) which was the mode used prior to the pandemic. It is anticipated that using face-to-face interviewing with CAPI will lead to an increase in response rate and the overall quality in the estimates of the QLFS.
- ❖ In that regard Q1:2022 was mainly collected using face-to face interviewing with CAPI.

#### **Evaluation of reliability of estimates**

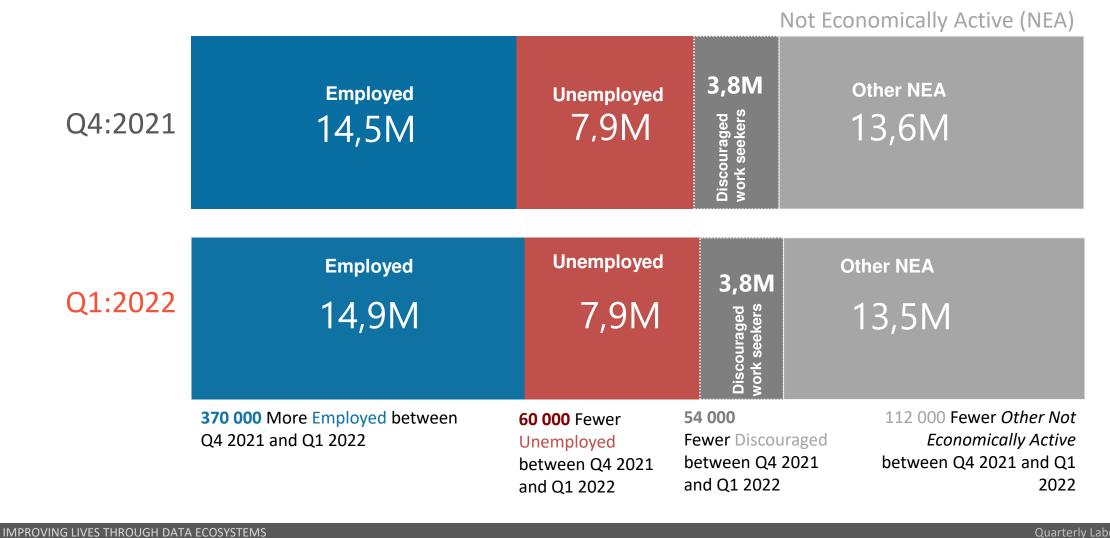

- Stats SA is guided by international best practices in the production of its official statistics, including labour statistics.
- ❖ In order to provide the public with quality statistics, the QLFS data is subjected to quality checks. After thorough checks, and with an improved response rate a decision was taken to publish metro and non-metro estimates for the QLFS Q1:2022.

stats sa

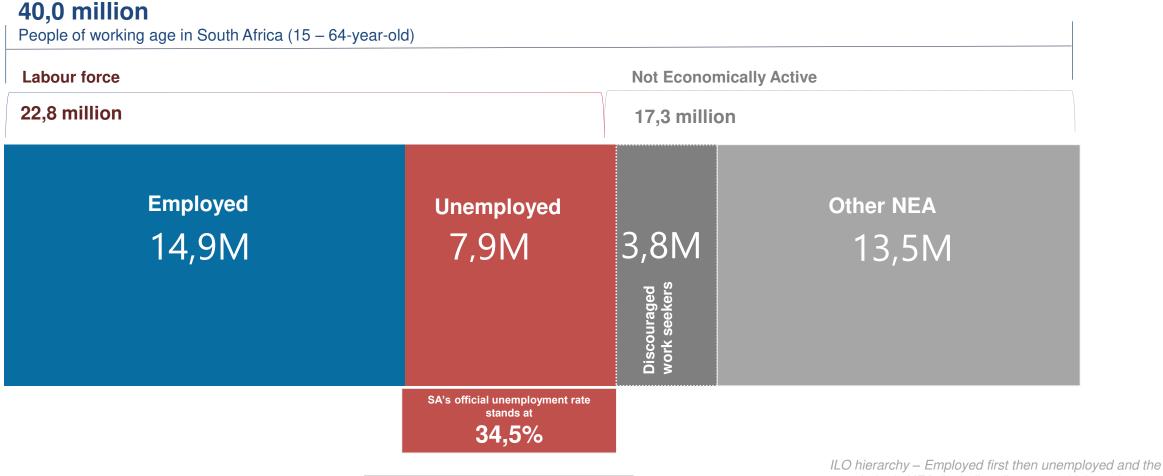

#### Both unemployed and not economically active declined in Q1:2022.

#### There were about 370 thousand more people employed in Q1:2022 than in Q4:2021

Due to rounding numbers may not add up

ILO hierarchy – Employed first then unemployed and the remainder is NEA (including discouraged job-seekers). 3 mutually exclusive groups. Cannot be in two groups at the same time.

IMPROVING LIVES THROUGH DATA ECOSYSTEMS

Quarterly Labour Force Survey Q1:2022

Decreased by 0,8 of a percentage point between

Q4:2021 and Q1:2022

### The number of **Not Economically Active** persons decreased by 166 000 in Q1:2022 compared to Q4:2021

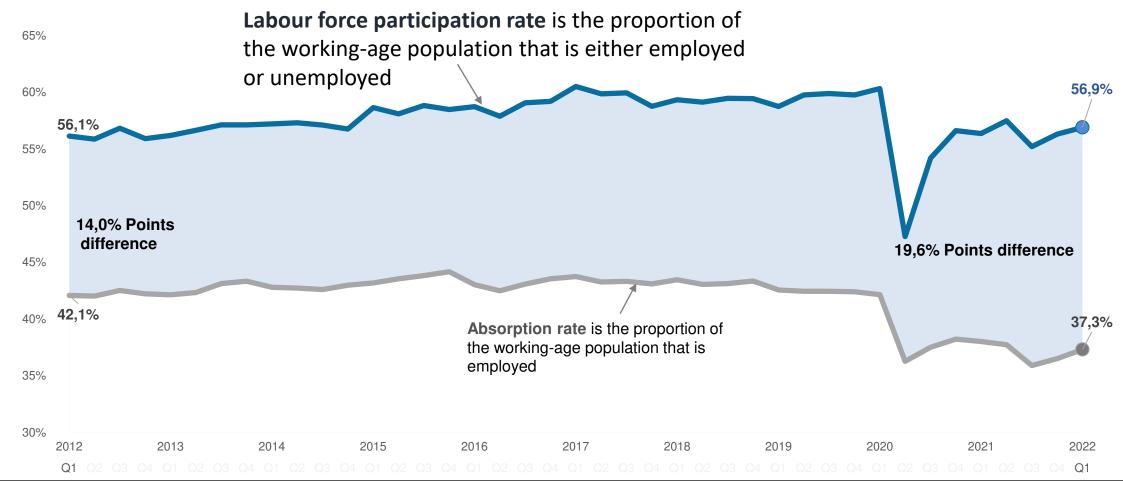

Q on Q Change Characteristics of the not economically active, Q4:2021 vs Q1:2022 Absolute Percentage Change Change Student 35,2% 2,7 % point (525 000) Discouraged work seekers 0,1 % point (54 000) Home-maker 15,3% 0,3 % point (82 000) Too old/young to work 10,7% 0,4 % point (45 000) Illness/disability 0,2 % point (18 000) Other reasons include: Other 2,6 % point (431 000) 8,0% National lockdown / COVID-19

IMPROVING LIVES THROUGH DATA ECOSYSTEMS

#### The **Labour force participation rate** increased by 0,6 of a percentage point from 56,3% in Q4:2021 to 56,9% in Q1:2022

Labour force participation and absorption rates Q1:2012-Q1:2022

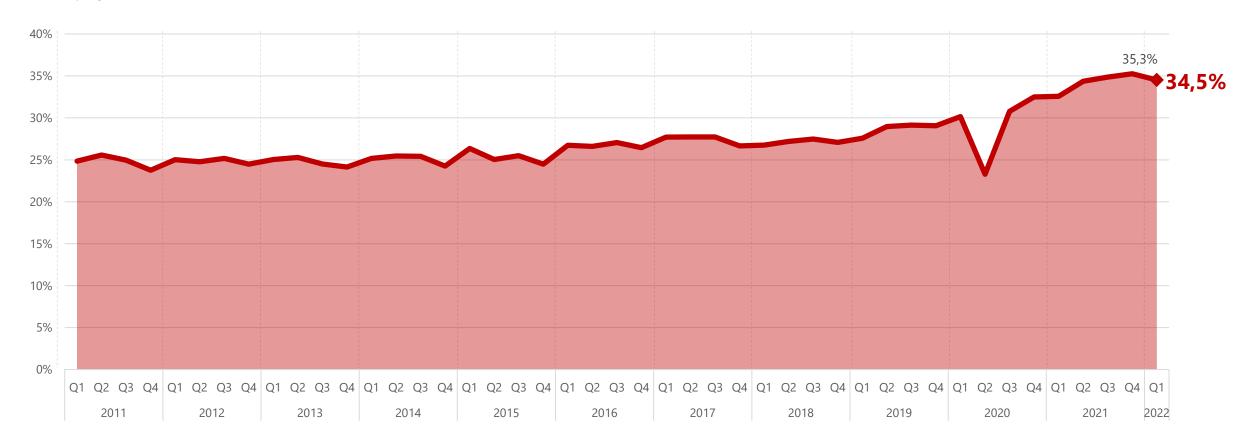

IMPROVING LIVES THROUGH DATA ECOSYSTEMS

### South Africa's unemployment rate decreased by 0,8 of a percentage point to 34,5% in Q1:2022 compared to Q4:2021.

Unemployment rate: Q1:2011 to Q1:2022

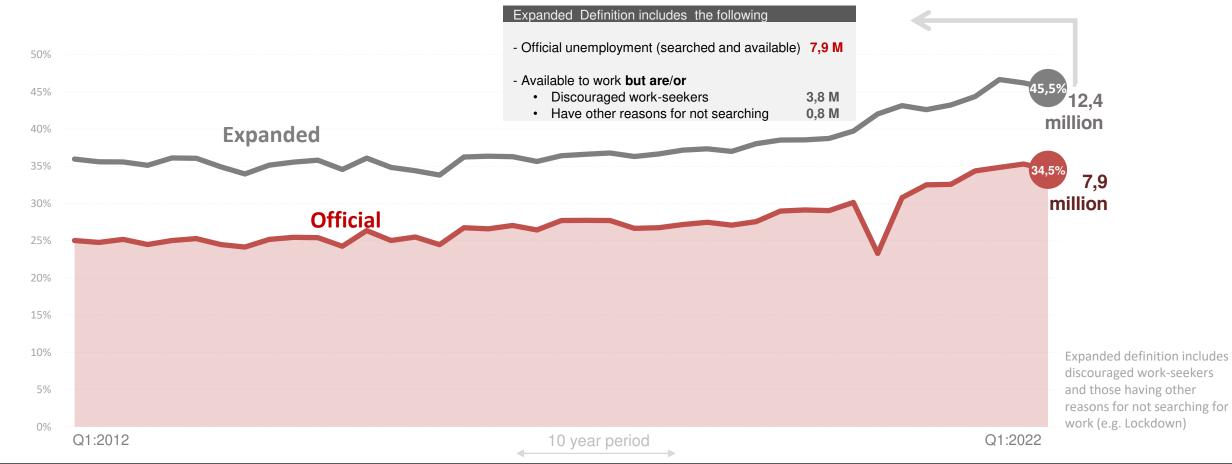

IMPROVING LIVES THROUGH DATA ECOSYSTEMS

### Expanded unemployment rate **decreased by 0,7** of a percentage point to 45,5% in Q1:2022 compared to Q4:2021.

Official vs Expanded unemployment: Q1:2012-Q1:2022

IMPROVING LIVES THROUGH DATA ECOSYSTEMS

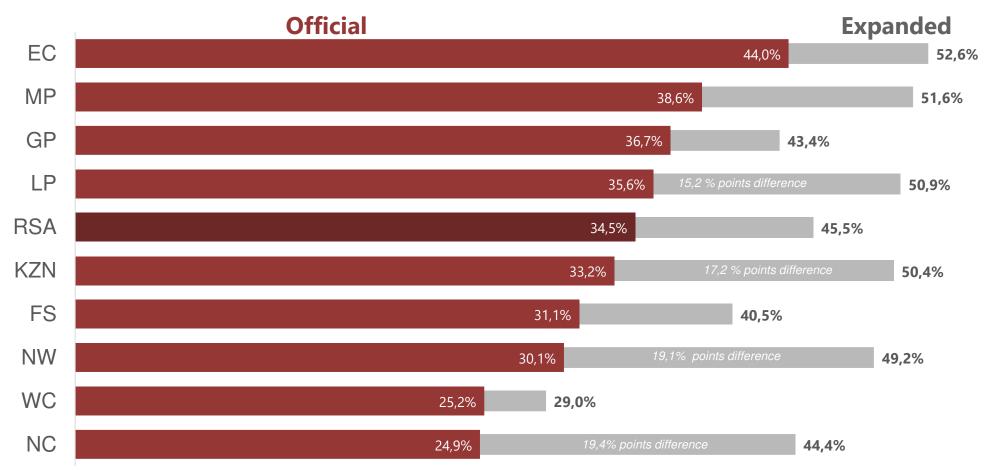

#### EC, MP, LP and KZN recorded expanded unemployment rates above 50,0% in

Q1:2022. NC, NW, KZN and LP recorded more than 15 percentage points difference between expanded and official

*unemployment rates.*Provincial unemployment rate: Official vs Expanded Q1:2022

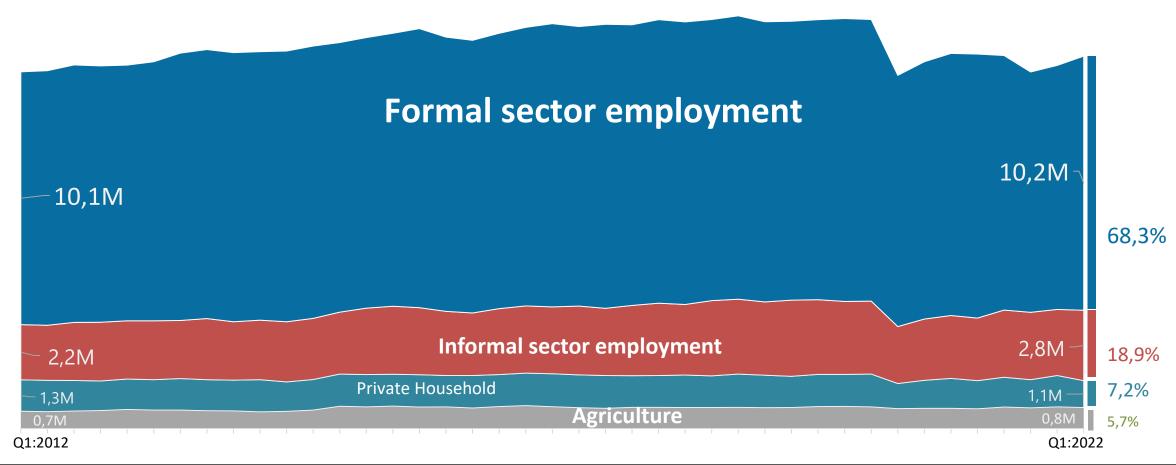

IMPROVING LIVES THROUGH DATA ECOSYSTEMS

#### The **formal sector** in South Africa accounts for **68,3%** of total employment.

Employment share by sector, Q1:2012 to Q1:2022

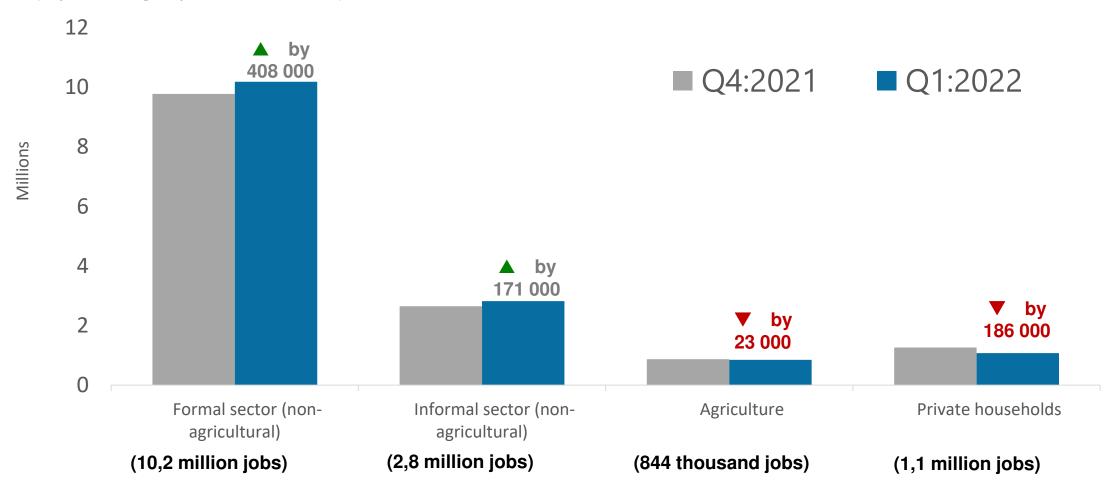

IMPROVING LIVES THROUGH DATA ECOSYSTEMS

### Formal sector employment increased by 408 thousand jobs between Q4:2021 and Q1:2022

Employment changes by sector, (Quarter-on-quarter)

IMPROVING LIVES THROUGH DATA ECOSYSTEMS

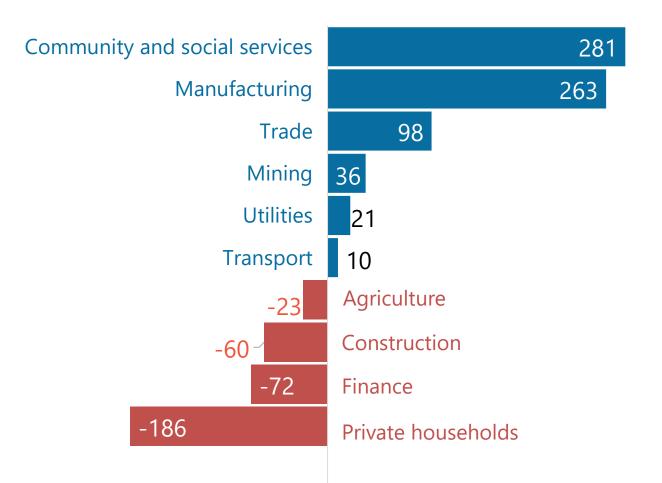

#### Employment increased by 370 000 in Q1:2022 compared to Q4:2021.

Employment changes by industry, Quarter-on-quarter change ('000)

Increases in employment were mainly in **Community and social** services, Manufacturing and **Trade** 

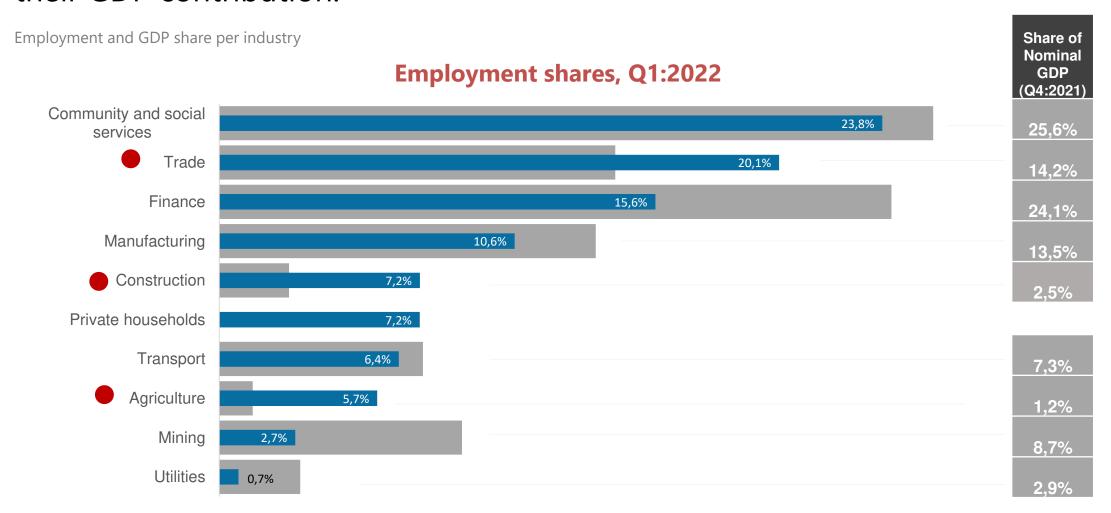

Percentage change 8,6% 20,0% 3,4% 9,7% 26,3% 1,0% -2,7% -5,3% -3,0% -14,8%

IMPROVING LIVES THROUGH DATA ECOSYSTEMS

#### **Trade, construction and agriculture** have higher employment shares relative to their GDP contribution.

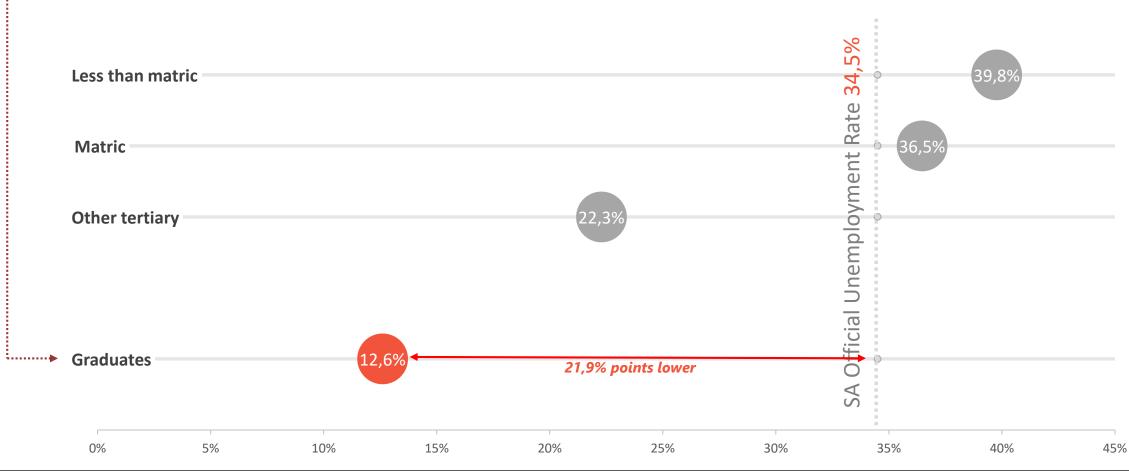

IMPROVING LIVES THROUGH DATA ECOSYSTEMS

### ....Graduate unemployment rate (12.6%) is 21,9% points lower than the national official unemployment rate

Official Unemployment rate Q1:2022

IMPROVING LIVES THROUGH DATA ECOSYSTEMS

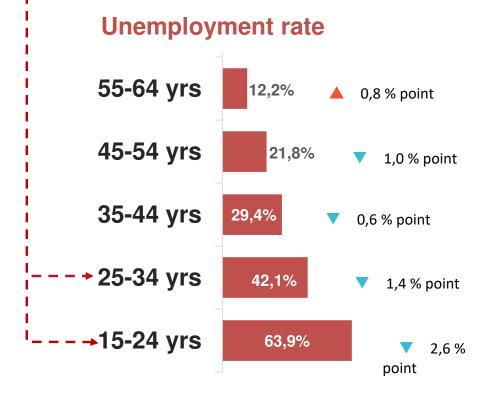

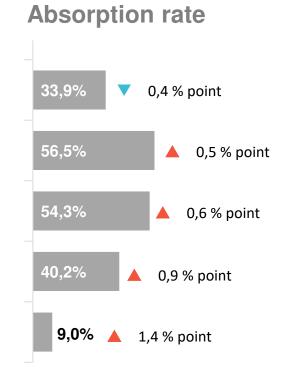

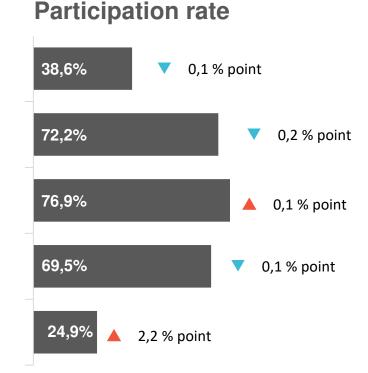

Youth aged 15-24 years and 25-34 years recorded the highest unemployment rates of 63,9% and 42,1% respectively

Labour market rates by age group, Q1:2022

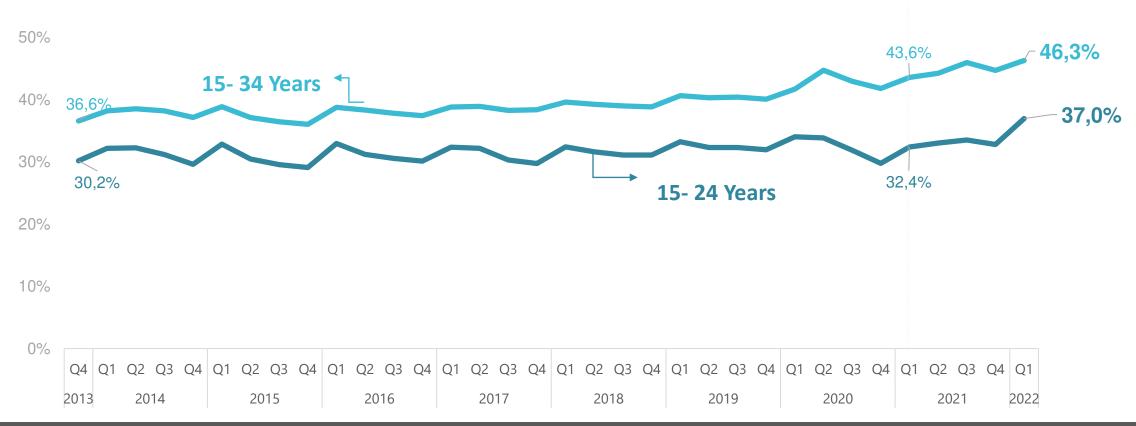

IMPROVING LIVES THROUGH DATA ECOSYSTEMS

Approximately **3,8 million** (37,0%) out of 10,2 million young people **aged 15-24** years were not in employment, education or training (NEET). The overall NEET rate increased by 4,6 percentage points in Q1:2022 compared to Q1:2021.

2013-2022 NEET rate for ages 15-24 & 15-34,

IMPROVING LIVES THROUGH DATA ECOSYSTEMS

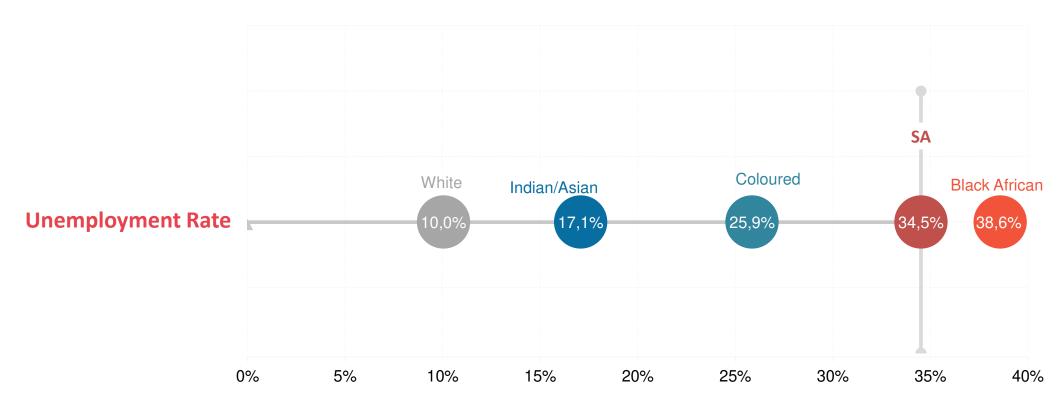

The unemployment rate among the **Black African** (38,6%) population group remains higher than the national average and other population groups.

**OFFICIAL** unemployment rate by population group, Q1:2022

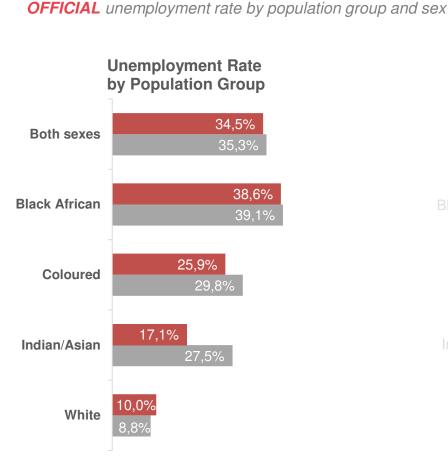

IMPROVING LIVES THROUGH DATA ECOSYSTEMS

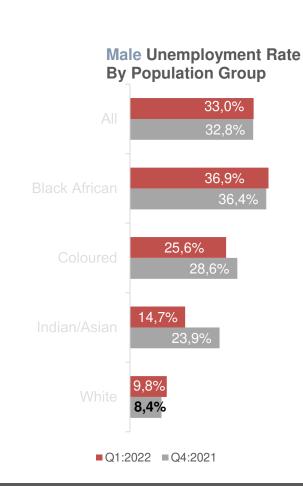

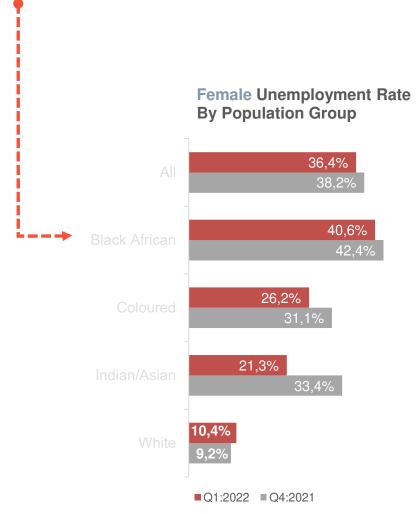

#### Black African women are the most vulnerable with an unemployment rate of 40,6%

in Q1:2022. This is 4,1 percentage points higher than the national average for women at 36,4%.

IMPROVING LIVES THROUGH DATA ECOSYSTEMS

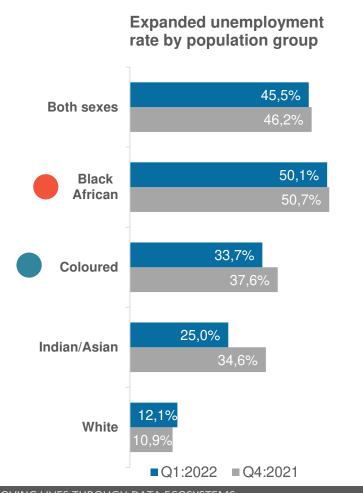

■Q1:2022 ■Q4:2021

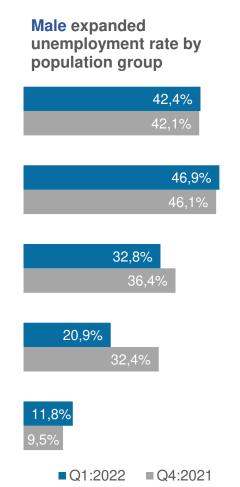

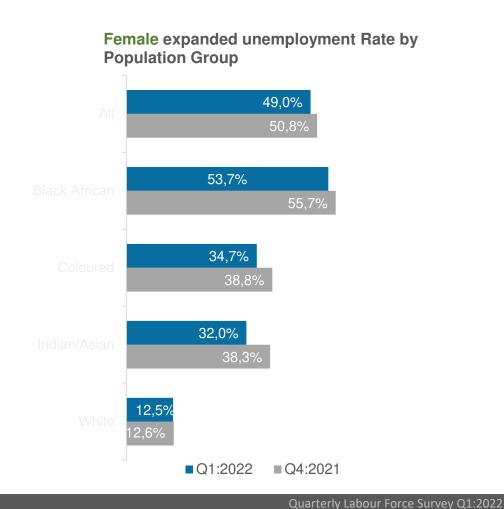

#### Irrespective of gender, the **Black African** and **Coloured** population groups remain vulnerable in the labour market.

**EXPANDED** unemployment rate by population group and sex

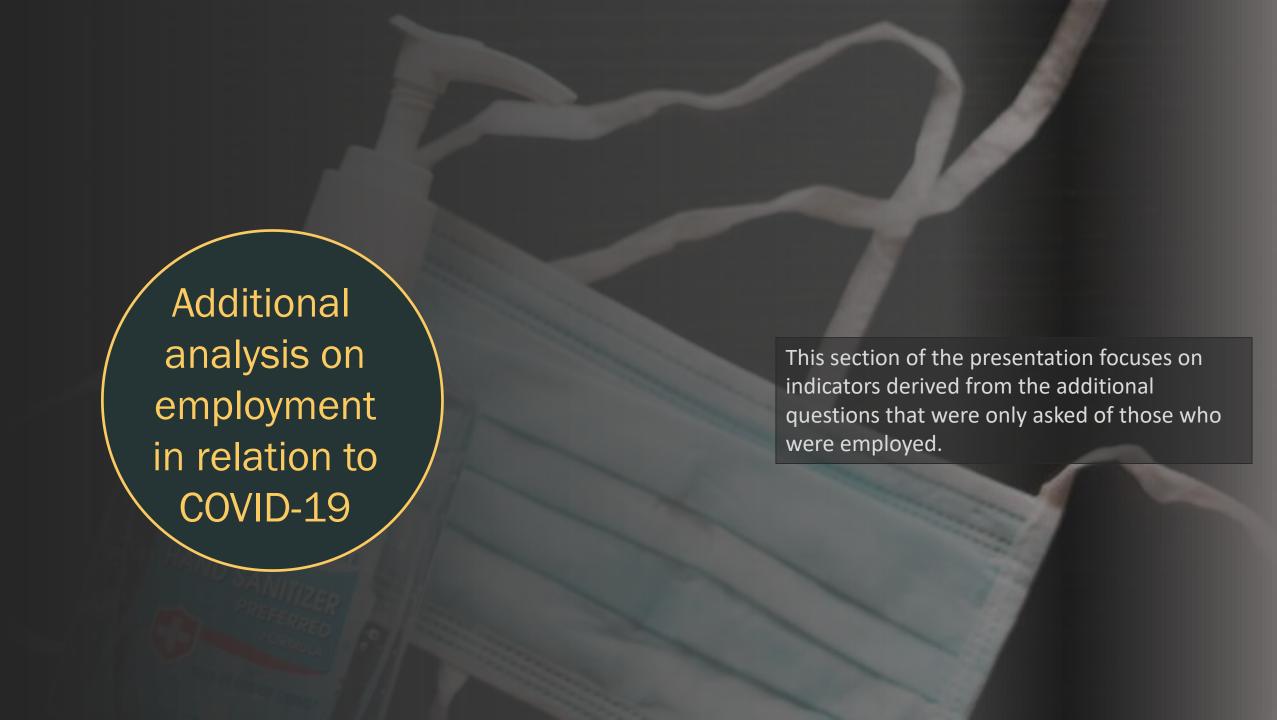

IMPROVING LIVES THROUGH DATA ECOSYSTEMS

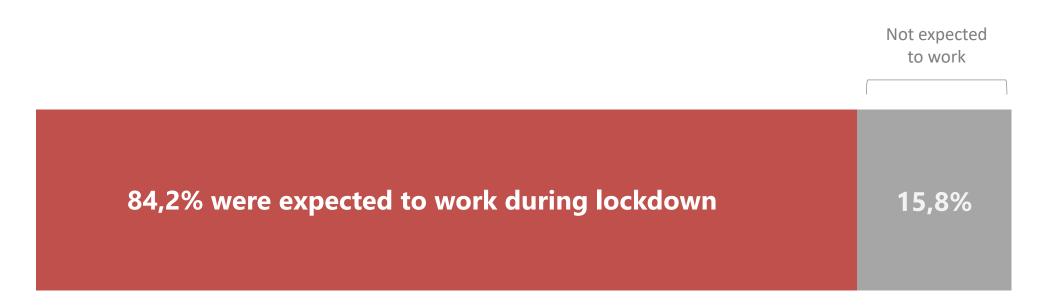

Of the 14,9 million persons who were employed in Q1:2022, at least 8 in every ten (84,2%) were expected to work during the national lockdown by the companies/organisations they work for.

Percentage distribution of those who worked during lockdown

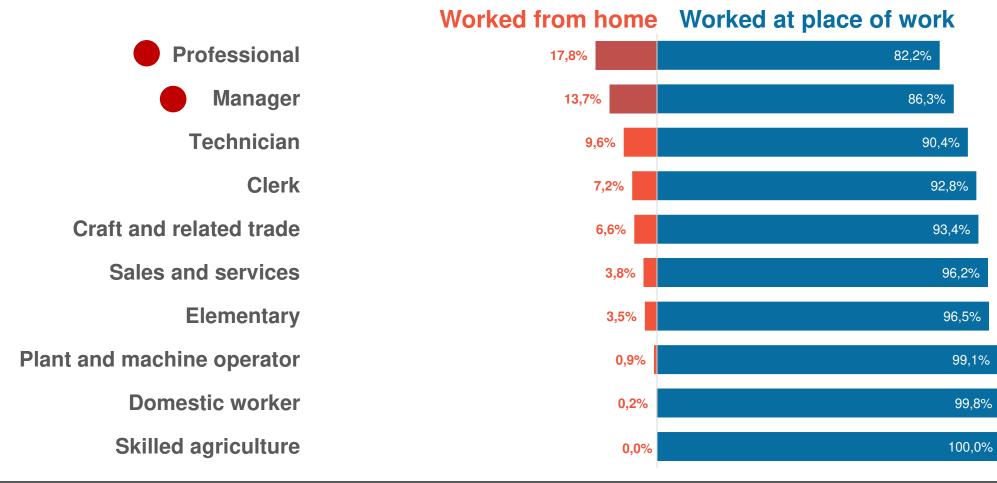

IMPROVING LIVES THROUGH DATA ECOSYSTEMS

### Professionals and Managers were more likely to work from home than all other occupations.

Place of work for persons who did any work by occupation, Q1: 2022

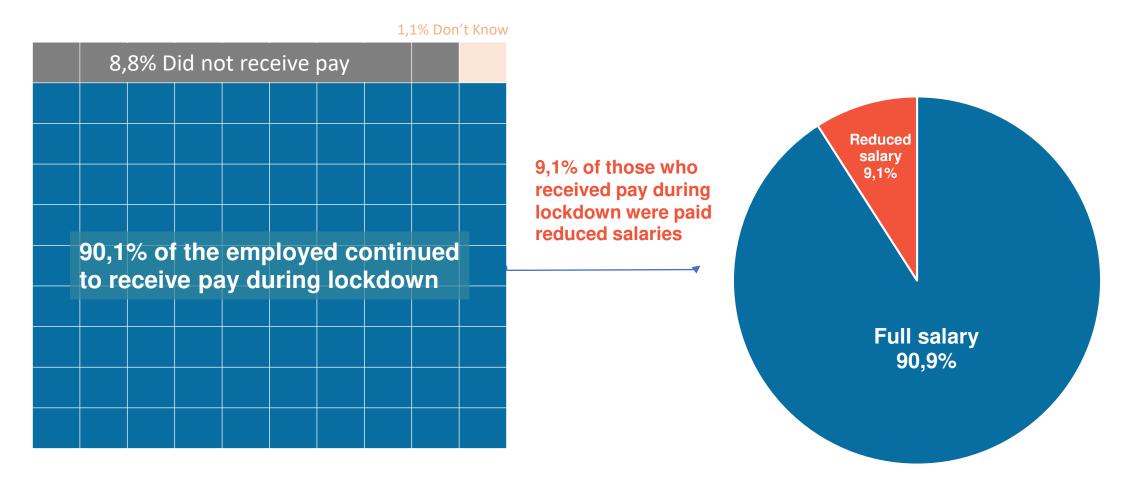

IMPROVING LIVES THROUGH DATA ECOSYSTEMS

\_

### **90,1% of the employed continued to receive pay** during lockdown in Q1:2022 compared to 92,1% in Q4:2021 .

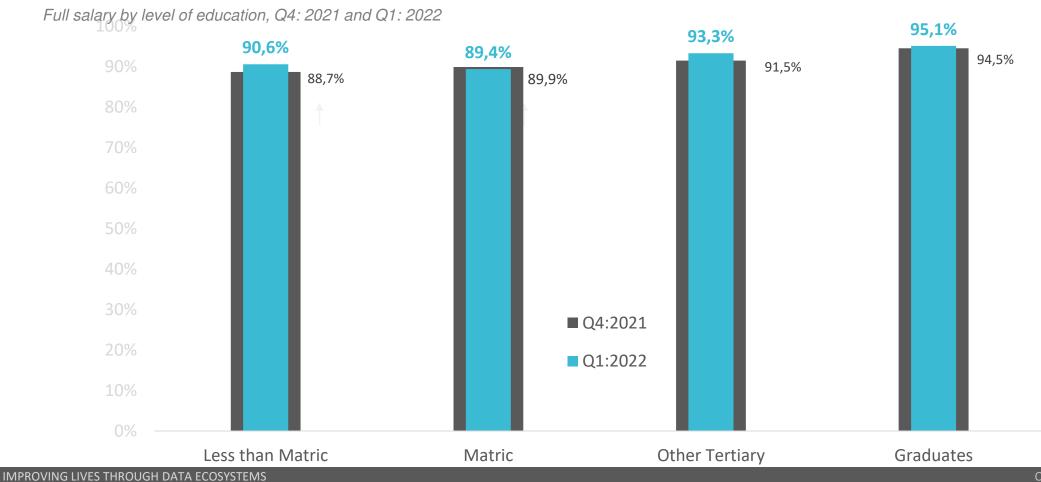

IMPROVING LIVES THROUGH DATA ECOSYSTEMS

Over 93% of graduates and those with other tertiary education received full salaries in Q1:2022. The share of graduates receiving full salary **increased** by 0,6 of a percentage point between Q4:2021 (94,5%) and Q1:2022 (95,1%).

M \*\*\* III

## RECAP (QLFS, Q1:2022)

- ❖ Unemployment rate decreased by 0,8 of a percentage point to 34,5%. The Absorption rate (37,3%) and labour force participation rate (56,9%) increased by 0,8 and 0,6 of a percentage point respectively.
- ❖ The number of those employed increased by 370 000 and the number of those unemployed decreased by 60 000 in Q1:2022 compared to Q4:2021.
- The largest employment gains were recorded in Community and social services (281 000), Manufacturing (263 000) and Trade (98 000).
